Wooden Teaspoons

Our Wooden Teaspoons are a perfect addition to your vending services. Its heat resistance and smooth design make it ideal for stirring hot beverages without the risk of splintering.

Key features:

- ✓ **Heat resistant:** Designed to withstand hot liquids, making it perfect for stirring without breaking or splintering.
- ✓ **Premium material:** Made from fully biodegradable FSC®-certified Birchwood.

Name	Material	SKU	Case Size	Pallet qty
Wooden Teaspoon	Birchwood	SABWTS1000		360

closing the loop.

Over 90% of today's single-use cups are not recycled properly. That's why 4 Aces goes beyond food service packaging by committing to making a positive impact on the environment.

Our "Closing the Loop" initiative focuses on educating customers on how to improve their recycling practices by connecting them with our collaborators to find the right Cup After Life schemes.

Together, we can close the loop and create a lasting change.

closing the loop

Paper cup recycling scheme.

co-cre8 encourages businesses to recycle the equivalent weight of all types of paper cups that scheme members place on the market.

- ✓ UK wide collection coverage
- ✓ Solution for all types of paper cups
- ✓ Effective & customisable cup collection units
- ✓ Tracking system provides exact weight of cups collected
- ✓ Online member portal and data collection

How co-cre8 works:

Sign up

Get access to a nationwide collection service and expert guidance.

Set up collection

Install customisable bins with tracked system collection units for accurate cup collection data.

Recycle and report

Use the co-cre8 online portal for data management and fulfil recycling reporting requirements.

Stack it, Pack it, Post it cup scheme.

Veolia supplies businesses with special internal bins for the disposal of cups, lids, and stirrers.

- ✓ UK wide collection coverage
- ✓ Improve carbon footprint
- ✓ Reduce landfill tax
- ✓ Boost recycling performance
- ✓ Meet corporate responsibility targets

How Veolia works:

Stack

Gather used coffee cups. No need to separate lids or sleeves from cups as Veolia has a process to ensure any remaining liquid is drained.

Pack

Reuse any cardboard box to pack the collected cups securely using a clear plastic liner inside for collection.

Post

A dedicated courier will promptly collect and deliver it to their nearest recovery facility. Any materials that cannot be recycled will be used to generate green energy.

Waste management services.

First Mile helps businesses recycle compostable products by reducing waste and carbon impact while converting non-recyclable waste into energy for homes.

- ✓ UK wide collection coverage
- ✓ Waste converted into fertiliser
- ✓ B Corp Certified
- ✓ Low-cost recycling boxes
- ✓ Easy to return difficult to recycle items

How First Mile works:

Use smart bins

Set up the four prepaid return boxes that turn into smart recycling bins for compostable products.

Prepare and schedule collection

When full, scan the QR code to schedule collection, and First Mile will pick up the waste.

Return the recycling

The materials will be sorted at the First Mile centre, compostables will be processed into biogas and fertiliser.
